

SAFETY

- Recognized as one of the safest electrical contractors in Massachusetts
- Average 1 Million man hours per year
- Full time safety officer
- Consistently maintain MOD factor of less than the industry standard of 1
- All employees are OSHA 10 trained

Sullivan & McLaughlin is committed to the safety and protection of our workers and clients. Team SullyMac will ensure that our workers are trained and dedicated to working safely. We have key personnel that will be involved with this project that will implement a site-specific safety plan and make sure that we are following the highest level of safety standard.

Our current Workers Compensation Mod Rate, which is currently at .85, indicating a loss experience that is 15% better than the average for our industry. This is a result of our diligent efforts in implementing our safety plan. Team SullyMac requires all personnel to utilize PPE per the requirements of NFPA 70E. SullyMac conducts weekly toolbox talks to encourage our work force to think about **Safety First**.

Team SullyMac was awarded the 2009 Merit Safety Award from the AGC, Massachusetts Chapter, for Exemplary Safety Record. In 2009 SullyMac was 25% below division incidence rate for electrical contractors.

SullyMac will have our Project Foreman act as the project's competent person, and we will have our safety officer make periodic site visits to ensure that we are following safety standards.
